MC-1 RACING SYNTHETIC 2T ENGINE OIL

MC-1 Racing Synthetic 2T Engine Oil is developed specifically as a high dilution ratio premix for racing 2-stroke engines, while still offering riders of vintage motorcycles the same quality engine oil that they have been using for years. With its history dating back to the 1970’s, MC-1 Racing Synthetic 2T Engine Oil is a true icon in the motorcycle industry. It is recommended for use in air-cooled or liquid-cooled, non-power valve 2-stroke racing engines. MC-1 Racing Synthetic 2T Engine Oil is intended as a premix; it is not designed for injection and/or autolube systems. MC-1 Racing Synthetic 2T Engine Oil continues to provide excellent lubrication in both vintage and modern engines.

MC-1 Racing Synthetic 2T Engine Oil is a not recommended for methanol base fuel.

Applications

♦ For premix only. Recommended ratio of 50:1 (2% oil) but can be used in ratios up to 80:1 depending on engine type and usage.
♦ Equally suitable for air-cooled or liquid-cooled high performance motorcycle 2T engines.
♦ Also suitable for all types of 2T engines including lawn mowers, weed eaters, trimmers, chainsaws, leaf blowers, snow blowers and more.

Features and Benefits

♦ Superior anti-wear
  Special anti-wear additives reduce cylinder and ring wear and improve bearing life for longer engine service.
♦ Superior deposit control
  Cleans existing deposits. Reduces gum and varnish.
♦ Superior combustibility
  High dilution ratios for cleaner burning. Smokeless.
♦ Fully synthetic
  Provides superior film strength over a wide temperature range for added protection. Clings to metal surfaces to minimize friction and piston scuffing.

General Description

MC-1 Racing Synthetic 2T Engine Oil’s synthetic formula offers exceptional film strength for superior wear protection. It increases bearing life and improves ring seal for better compression and sustained power.

MC-1 RACING SYNTHETIC 2T ENGINE OIL

Product No. 99400

Mixing Instructions
MC-1 Racing Synthetic 2T Engine Oil is recommended for use at a premix ratio of 50:1 (2%). Ratios up to 80:1 may be used depending on engine type and usage.

Note: It is recommended that the current fuel/oil mix in use be drained before to using MC-1 Racing Synthetic 2T Engine Oil.
