4. FIRST-AID MEASURES

Inhalation:
Move to fresh air. Oxygen or artificial respiration if needed. Do not use mouth-to-mouth method if victim inhaled the substance. Induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Get medical attention immediately.

Skin contact:
Rinse skin with water/shower. Get medical attention if irritation develops and persists.

Eye contact:
Rinse with water. Get medical attention if irritation develops and persists.
Ingestion
If swallowed, seek medical advice immediately and show this container or label. Rinse mouth. Do not induce vomiting. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs. Do not use mouth-to-mouth method if victim ingested the substance. Induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Never give liquid to an unconscious person.

General advice
Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. IF exposed or concerned: Get medical advice/attention. In case of shortness of breath, give oxygen. Keep victim warm. Keep victim under observation.

Notes to physician
Oxygen, if needed. Keep victim warm. Keep victim under observation. Symptoms may be delayed.

5. FI RE-FI GHTING MEASURES

Suitable extinguishing media
Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Extinguishing media which must not be used for safety reasons
Do not use water jet as an extinguisher, as this will spread the fire. Water.

Carbon monoxide and carbon dioxide.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions
Keep unnecessary personnel away. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Keep upwind. Keep out of low areas. Ventilate closed spaces before entering them. In case of spills, beware of slippery floors and surfaces.

Environmental precautions
Prevent further leakage or spillage if safe to do so. Do not contaminate water.

Containment procedures
Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible.

Methods for cleaning up
Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Cover with plastic sheet to prevent spreading. Prevent product from entering drains. Do not allow material to contaminate ground water system. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills in original containers for re-use. For waste disposal, see section 13.

Engineering measures

Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Personal protective equipment

Respiratory protection Avoid exposure - obtain special instructions before use. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.

Hand protection Avoid exposure - obtain special instructions before use.

Eye protection Avoid exposure - obtain special instructions before use.

Skin and body protection Avoid exposure - obtain special instructions before use.

General Applicable for industrial settings only: Use personal protective equipment as required. Keep working clothes separately.

Hygiene measures

When using, do not eat, drink or smoke.
