### SECTION 4 EMERGENCY and FIRST AID PROCEDURES

**EYE CONTACT:** Flush eye with water for several minutes holding the eyelids apart. Get medical attention if irritation persists.

**SKIN CONTACT:** Wash thoroughly with soap and water. Remove contaminated clothing and launder before reuse. Get medical attention if irritation develops.

**INHALATION:** Remove victim to fresh air. If irritation develops or breathing is difficult, get medical attention.

**INGESTION:** Rinse mouth with water. Do not induce vomiting. Never give anything by mouth to an unconsciousness person. Get medical attention.

**Most important symptoms/effects, acute and delayed:** May cause mild eye irritation. Prolonged skin contact may cause irritation. Excessive inhalation of vapor or mists may cause upper respiratory tract irritation and central nervous system effects. Swallowing may cause nausea, vomiting and diarrhea.

**Indication of immediate medical attention and special treatment, if necessary:** None required under normal conditions of use.

#### SECTION 5 FIRE and EXPLOSION HAZARD DATA

**Suitable extinguishing media:** Use water spray or fog, foam, carbon dioxide, dry chemical to extinguish.  
**Specific hazards arising from the chemical:** May form combustible mixtures at temperatures at or above the flashpoint. Combustion may produce carbon monoxide, carbon dioxide, sulfur oxides and hydrocarbon fragments.  
**Special protective equipment and precautions for fire-fighters:** Firefighters should wear full emergency equipment and a NIOSH approved positive pressure self-contained breathing apparatus. Cool exposed intact containers with water spray or stream.

#### SECTION 6 ACCIDENTAL RELEASE MEASURES

**Personal precautions, protective equipment, and emergency procedures:** Wear appropriate protective equipment. Wash thoroughly after handling.  
**Environmental hazards:** Avoid release into the environment. Report spill as required by local and federal regulations.  
**Methods and materials for containment and cleaning up:** Dike spill and collect with an inert absorbent and place into closable containers for disposal.

#### SECTION 7 HANDLING and STORAGE

**Precautions for safe handling:** Avoid eye and prolonged/repeated skin contact. Avoid breathing vapors and mists. Use with adequate ventilation. Wash thoroughly after handling. Remove oil-soaked clothing and launder before re-use. Discard oil soaked shoes and other items that cannot be laundered.

Empty containers retain product residues. Do not cut, weld, braze, etc. on or near empty containers. Follow all SDS precautions in handling empty containers.

**Conditions for safe storage, including any incompatibilities:** Protect containers from physical damage. Store in a cool area away from heat, sparks, open flames and oxidizers.

#### SECTION 8 EXPOSURE CONTROLS and PERSONAL PROTECTION

##### Exposure Guidelines:

<u>Chemical Name</u>	<u>CAS#</u>	<u>Exposure Limits</u>
Severely Refined Petroleum Oils	64741-88-4	5 mg/m <sup>3</sup> TWA OSHA PEL
	64742-01-4	5 mg/m <sup>3</sup> TWA ACGIH TLV (inhalable)
Aliphatic Petroleum Hydrocarbons	Proprietary	1200 mg/m <sup>3</sup> (165 ppm) manufacturer recommended

**Appropriate engineering controls:** Good general room ventilation (equivalent to outdoors) should be adequate under normal conditions. If the recommended exposure limit is exceeded increased mechanical ventilation such as local exhaust may be required.

**Respiratory protection:** None needed under normal use conditions with adequate ventilation. If exposures are excessive, use a NIOSH approved respirator with organic vapor cartridges and particulate pre-filter. Selection of respiratory protection depends on the contaminant type, form and concentration. Select in accordance with OSHA 1910.134 and good Industrial Hygiene practice.

**Skin protection:** Nitrile rubber or other impervious gloves are recommended where prolonged or repeated skin contact is likely.

**Eye protection:** Safety glasses or goggles if splashing is possible.

**Other:** Impervious apron, boots and other clothing are recommended if needed to avoid prolonged/repeated skin contact. Suitable washing facilities should be available.
